# SOLDO

Our story

Soldo was founded in 2015 by entrepreneurs and banking experts united by the search for a simple and effective way to manage money within organisations.

With over 20 years of experience in payment services and developing transactional systems, the team has harnessed the latest financial technology to provide the smartest corporate payments and expenses solution. The team didn't just stick a label on an 'easy' solution but invested heavily in the creation of a world class technological, regulatory and operational platform and on the best team to be the foundation for the growth of the company.

Soldo is headquartered in London and has offices in Rome, Milan and Dublin.

What is Soldo?

Soldo's spend control platform comes with integrated prepaid Soldo Mastercard cards, a web-based administration console and a mobile app.

With Soldo, businesses empower employees and departments to make purchases on their behalf with plastic and virtual Soldo Mastercard cards, yet retain total and constant control, thanks to bespoke budgets, limits and spending rules. Using the Soldo mobile app, employees can add crucial data to each transaction, such as photos of receipts, notes and tags. Soldo generates comprehensive spending reports in only a couple of clicks, that permit an entirely new level of insight and integrates with all major accounting software to maximise efficiencies and effectiveness across the organisation. With Soldo, the time and tedium traditionally involved in expense management and reporting is eliminated.

SOLDO

Key features

DELEGATE

Allocate plastic and virtual prepaid Soldo Mastercard cards to employees and departments and control their balance in real time and for free. Empower staff to make the purchases their work requires, removing the time and frustrations associated with complex company purchasing procedures.

CONTROL

Allocate specific budgets, set bespoke limits and rules for each employee and department, and execute changes in real time whenever necessary. Take back control and in doing so eliminate overspending and reduce the risk of fraud.

ENRICH

Use the Soldo mobile app to instantly enrich transaction data with photos of receipts, as well as tags, notes and categories. Eradicate the time and tedium of expense reconciliation and receipt-hunting.
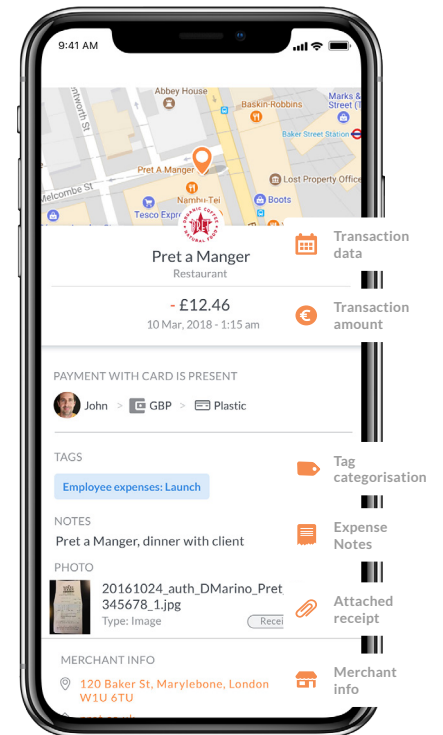

VISIBILITY & INSIGHT

View transactions in real time on the Soldo console and use filters to instantly get the exact data you need. Gain instant actionable insights, making intelligent modelling and planning an effortless reality.

EXPENSE REPORTING

Generate detailed, specific and data-rich expense reports with only a couple of clicks, choosing from the full range of formats to guarantee seamless integration with all the major accounting software. Put an end to the tedium and cost of traditional expense reporting.

Founder & team

CARLO GUALANDRI (CEO)

Soldo's founder and CEO, Carlo Gualandri has a solid track record of building life-changing organisations in regulated industries that are going through transformation. Prior to Soldo, Carlo founded Gioco Digitale, a company that became the leader in regulated online gaming in Italy and as founder of Matrix, Carlo launched Virgilio, the first web portal in Italy; Active Advertising, the online advertising network; and participated in the startup of Fineco, the leading Italian digital bank.
